

## Read Excel File

This example reads an Excel file content and then displays information for the selected item.

The screenshot shows the Microsoft Excel interface. The ribbon includes Clipboard, Font, Alignment, Number, and Styles. The spreadsheet data is as follows:

	A	B	C	D	E	F	G	H	I
1	Product 1	29.95	34						
2	Product 2	9.95	60						
3	Product 3	66.5	12						
4									
5									
6									
7									
8									
9									
10									
11									
12									
13									
14									
15									
16									

The 'Select Product' dialog box shows a list of products: Product 1, Product 1, Product 2, Product 3. The 'Macro Toolworks 9.3.0 Professional' dialog box displays the following information:

**i** The Product 2 costs \$9.95.  
There are 60 pieces in stock.

## How to run

1. Download the file, unzip it and open the "ExcelSample01.4tw" file in the Macro Toolworks (version 9.3.0 or newer) using "File/Open" menu command.
2. Run the macro called "Get product info".
